## Fishing Organizer Log Software FOL2002™

Fishing Organizer Log FOL2002™ is a Windows® 95/98/ME/NT4.0/2000/XP software application developed to track and store fishing results, display pictures/maps, analyze fishing strategies and help establish fishing patterns. The software enables you to store and easily find fishing results for an entire day, fish species, lake, lure etc., and will calculate the total weight of the fish in ounces and pounds and total pounds (good for tournaments). The **Report Preview** displays the record information in an organized report including pictures. The List **Report** will display the fish species, lake, lure, lure color, time caught, structure, depth caught and fish weight in pounds for a given search criteria. There are checkboxes to easily view and track your best and worst fishing days! The software was developed by tournament/guide fisherman Robert Parkin and will help catch fish for both tournament and recreational anglers.

Create Records: You can enter the data anywhere in the search data box and FOL2002<sup>™</sup> will find it. To assist in data entry, you can use the "Copy-Add-Paste" buttons to copy the data to your new record. Each record is assigned a unique searchable record number and a sequential record count number is also displayed.

Lure Selection: Each lure selection category has its own set of caption titles and dropdown data boxes for: Crankbaits, Jigs, Spoons, Live bait, Spinnerbaits, Topwater, Soft and Fly. Select the lure you are using any time the record is open.

**Fishing Patterns:** Keep track of the best and worst fishing days by checking the appropriate checkbox: **Trophy, Over 12 inches, Excellent, Good, Fair and Poor.**  **Fishing Plan, Lure Selection and Results:** Select from dropdown lists the **Fish Species, Seasonal Period, Water and Weather Conditions.** Then click the search button and it will display a Fishing Plan, Lure Selection and Pattern for those conditions along with Reference, Results and Electronics sections.

Each tab has one or more memo boxes to store specific details for that subject. All these fields are searchable from the top menu along with **Record Number** and **GPS Coordinates**. You can navigate through multiple tabs and edit the text fields **to modify the fishing plan** to your own strategies.

Included in the database are bass fishing seasonal patterns, tackle inventory and additional **bass** catching tips/strategies in the reference section!

**List Search:** Perform a **list search** with up to five separate search fields! Search "ALL" records or select a filtered search based on the checkboxes.

**Total fish weight /List Search:** The total fish weight for a given search criteria will be displayed on the bottom of each list search.

## Fishing Organizer Log Software FOL2002™

Load Pictures: Display your personal fishing pictures for your catch! There are three picture tabs to view up to eight pictures per record. Each horizontal tab stores three pictures each and one vertical tab stores two pictures. Each tab will automatically resize the picture for viewing.

**Fish Lists:** Includes selection lists of freshwater and saltwater fish species. Pictures of freshwater fish and a **bonus over 60 outdoor/fishing wallpaper photos** are included on the CD!

**Report Preview:** The **Report Preview** feature includes the record data and up to four pictures on one page. The **Image Group Preview** displays all eight images on one page. Both the Report Preview and Group Image Preview will print the images displayed on the screen!

**Reports:** You can view, print or save records as a text file and generate list search reports.

**Organize Tackle:** Enter all your fishing tackle in one record so you know what you have and what you need. The search feature can help track the performance of your tackle selection.

**Notes/Contributing Factors:** Personal notes can be entered (or pasted) into the note field which can hold up to 64 pages of text and is searchable!

**Supersize Picture/Document Preview:** This feature will display up to **four large picture files.** Besides personal photos, you can view: **Lake maps**, Graphs, Magazine Articles and other Fishing Documents linked to a record. You will be able to see the entire page and print it out.

**Picture Browser** program is included with the software and pictures of the most **common freshwater fish species** that you can link to the record or just view to learn about fish!

## **Many Satisfied Customers!**

"If you are a fisherman, YOU NEED THIS PROGRAM!! A++ " John H.

"This is a great program can't wait for SPRING!! Thanks. A++" Jack M.

"Great Software! Is going to be so much easier to keep track of fishing than before!"
